

# Daily Activity

Children love to be little helpers. They love buttons and switches.

Spend some time in the kitchen looking at the appliances with your child. Safety first! Check everything is off/cold and be aware of sharp blades.

## Kitchen Technology

Maybe let your child push the start button on the washing machine.

Ask your child if they know what the appliances do. Spend some time explaining how the appliances work. Where it's safe, ask your child to help you use an appliance.

Discuss safety in the kitchen. Talk about hot and sharp items.
